Barrel Short - 40mm For WP 80

SKU: GW-B-WP80-S

Features & Benefits

- Short (40mm) barrel for WP 80 soldering iron
- Provides optimal heat transfer for consistent soldering results
- Durable construction for long-lasting use
- Easy installation and quick replacement
- Ideal for precision soldering and compact workspaces

About the Barrel Short - 40mm For WP 80

The Barrel Short (40mm) is a high-quality replacement part designed for Weller WP 80 soldering irons, offering a secure and reliable connection between the handle and the heating element.
This compact 40mm barrel is ideal for applications where a shorter barrel length is preferred, ensuring optimal heat transfer and consistent soldering performance. Whether you're performing precision soldering tasks or routine repairs, this short barrel helps maintain the efficiency and longevity of your WP 80 soldering iron.
Easy to install, the Barrel Short (40mm) is perfect for both professional and hobbyist users looking to extend the life and functionality of their soldering tool.
