00SA TWEEZERS

SKU: G-HT-00SA

Features & Benefits

- Fine, straight precision points for high accuracy
- Flat inside edges for secure handling of components
- Made from stainless steel for durability and strength
- Antimagnetic, ideal for electronic assembly and sensitive work
- 120mm length for optimal control and comfort
- Suitable for heavy-duty applications and precision tasks
- Featuring fine, straight precision points and flat inside edges, these tweezers offer exceptional accuracy and control when handling small, delicate components

About the 00SA TWEEZERS

The 00SA Tweezers are specifically designed for electronic assembly and heavy-duty applications.
Featuring fine, straight precision points and flat inside edges, these tweezers offer exceptional accuracy and control when handling small, delicate components.
Made from stainless steel and being antimagnetic, they are ideal for use in sensitive environments, such as electronics and electrical work. With a length of 120mm, they provide a comfortable and secure grip for precise handling in demanding tasks.
