

1.5mm Flush Cutter

SKU: GT-TR30-15

Features & Benefits

- ◆ **Clean, Flush Cut:** Specially designed for cutting component leads at 1.5mm from the surface.
- ◆ **Steel Thickness (3mm):** Provides durability and strength for reliable, long-lasting performance.
- ◆ **Total Length (138mm):** Compact and ergonomic design for improved control and precision.
- ◆ **Grip Model (St):** Ensures a secure and comfortable grip during use.
- ◆ **Medium Head:** Versatile design suitable for a variety of cutting tasks.
- ◆ **Cutting Force (5.5kg):** Offers enough cutting force for effective, efficient cuts.
- ◆ **Copper Wire Cutting Capacity (Ø1.30mm, 16 AWG):** Ideal for cutting copper wire up to 1.30mm in diameter.
- ◆ Featuring a medium head and a cutting force of 5.5kg, it's capable of cutting copper wire up to Ø1.30mm (16 AWG), making it perfect for professional electronics work and other precise tasks

About the 1.5mm Flush Cutter

The TR 30 15 - 1.5mm Flush Cutter is designed for precision, providing a clean, flush cut, especially for cutting component leads at 1.5mm from the surface.

With a robust steel thickness of 3mm and a total length of 138mm, this tool ensures both strength and control for various cutting applications.

Featuring a medium head and a cutting force of 5.5kg, it's capable of cutting copper wire up to Ø1.30mm (16 AWG), making it perfect for professional electronics work and other precise tasks.
