1000mm SMT Conveyor

SKU: 601-609

Features & Benefits

- **SMEMA Compatibility**: Ensures seamless integration with other equipment in the production line for efficient operations.
- **Flexible PCB Handling**: Accommodates boards from 50 x 50mm to 960 x 460mm, supporting a wide range of PCB sizes.
- **Space-Saving Design**: Its compact length makes it perfect for use in production areas with space constraints.
- **Variable Speed Control**: Offers adjustable speeds for flexible production line requirements.
- **Modular Design**: Enables easy adaptation and future upgrades for growing production needs.
- **Durable Construction**: Built with a sturdy structural design for long-lasting reliability in demanding environments.
- **Smooth Adjustment**: Features a parallel ball screw adjustment method for precise positioning.
- **Special Aluminium Slot Rail**: Designed for smooth transmission and efficient PCB handling.
- **CE Certified**: Complies with European safety standards for peace of mind.

About the 1000mm SMT Conveyor

The 1000mm SMT Conveyor is an essential piece of equipment for PCB assembly lines, offering versatility for various functions such as equipment linking, visual inspection, manual assembly, and PCB buffering.
Designed to meet SMEMA standards, this conveyor is ideal for tight spaces and offers a space-saving, compact solution for SMD production lines.

Specifications

Property	Detail
Dimensions	960 x 460mm
Application	ESD-protected areas, electronics mfg, cleanrooms
