- ◆ Priced per metre, available in lengths up to 10m
- ◆ Designed for connecting extraction pumps to 125mm arms and nozzle attachments
- ◆ Smooth internal wall for optimal airflow and suction
- ◆ Suitable for air, dust, gases, and sawdust applications
- ◆ Ideal for industrial fume extraction systems
- ◆ Compatible with a wide range of accessories and adaptors for flexible installations

### About the 125mm Flexible Hose (per metre)

The BOFA A1080042 125mm Flexible Hose is a high-quality PVC hose with a steel spiral designed to provide a secure connection between your extraction pump and a 125mm arm or nozzle attachment.

Ideal for use in industrial fume extraction systems, this hose is perfect for handling air, dust, gases, and sawdust.

The smooth internal wall ensures optimal airflow, and with a variety of lengths available (up to 10m), it is priced per metre for flexible installations.

For quick, efficient setup, we also offer a range of accessories and adaptors to suit your system's needs.
