

1500mm SMT Conveyor

SKU: 601-612

Features & Benefits

- ◆ **SMEMA Compatibility:** Easily integrates with other SMEMA-compatible equipment for smooth operation and workflow.
- ◆ **Flexible PCB Handling:** Accommodates boards ranging from 50 x 50mm to 1460 x 460mm, providing excellent versatility for various PCB sizes.
- ◆ **Compact & Space-Saving:** Short length allows for placement in areas with space constraints, optimizing your production environment.
- ◆ **Variable Speed Control:** Offers adjustable speeds to meet different production needs and ensure optimal operation.
- ◆ **Modular Design:** Provides adaptability for future upgrades and adjustments to fit changing production requirements.
- ◆ **Durable Construction:** Features a robust structural design, ensuring long-term reliability and stability in demanding environments.
- ◆ **Precise Adjustment:** Smooth parallel ball screw adjustment method ensures accurate positioning and smooth operation.
- ◆ **Aluminium Slot Transmission Rail:** Special design for efficient and reliable PCB handling.
- ◆ **CE Certified:** Compliant with European safety standards for safe operation.

About the 1500mm SMT Conveyor

The 1500mm SMT Conveyor is designed to meet the needs of SMD production and PCB assembly lines, offering a reliable solution for linking equipment, visual inspection, manual assembly, and PCB buffering.

This conveyor is SMEMA compatible, ensuring seamless integration with other production equipment. Its compact design and flexible capabilities make it ideal for facilities with space limitations.

Specifications

Property	Detail
Dimensions	1460 x 460mm
Application	ESD-protected areas, electronics mfg, cleanrooms
