15A TWEEZERS

SKU: G-HT-15A

Features & Benefits

- Made from non-magnetic stainless-steel alloy for durability
- 120mm length for optimal grip and control
- Strong cutting capability for precision tasks
- Ideal for handling delicate materials and technical applications
- High-quality construction for long-lasting performance

About the 15A TWEEZERS

The 15A Tweezers are high-quality precision instruments crafted from a non-magnetic stainless-steel alloy, ensuring durability and reliability for a wide range of tasks.
With a 120mm length, these tweezers provide a strong grip and control, making them perfect for cutting, handling delicate materials, or performing detailed technical work.
Their non-magnetic properties make them ideal for use in sensitive environments where magnetism is a concern.
