

## 2.3mm ESD Nibblers. (Depanelizer Tool)

SKU: GT-DP23-ESD

### Features & Benefits

- ◆ Manual tool for quick and efficient PCB separation
- ◆ ESD-safe design for protection of sensitive components
- ◆ **Maximum isthmus length:** 3.0mm
- ◆ Provides smooth, clean cut edges on PCBs
- ◆ Economic and easy-to-use solution for depaneling

### About the 2.3mm ESD Nibblers. (Depanelizer Tool)

The 2.3mm ESD Nibbler is a manual depanelizer tool designed for the quick, efficient, and safe separation of larger PCB panels. It provides clean, well-finished cut surfaces without causing damage to sensitive components.

Ideal for use with PCBs where the isthmus (tab) length does not exceed 3.0mm, this tool is perfect for precise depaneling in production environments. Its ESD-safe design ensures the protection of delicate electronic parts during the process.
