

2.3mm PCB Nibblers. (Depanelizer Tool)

SKU: G-HTN-2.3

Features & Benefits

- ◆ Perfect for single PCB separation in multi-circuit board production
- ◆ Available in four sizes to match common routed slot sizes
- ◆ Cuts through PCB tags with smooth and square edges
- ◆ Designed for precision and clean cuts during the depanelizing process

About the 2.3mm PCB Nibblers. (Depanelizer Tool)

The 2.3mm PCB Nibbler is an essential tool for single PCB separation in multi-circuit board production.

It efficiently nibbles through PCB tags, leaving smooth, square edges.

With four available sizes, this tool is highly versatile and designed to match the most common routed slot sizes, making it an ideal choice for precise depanelizing tasks.
