

## 2.5mm ESD Nibblers. (Depanelizer Tool)

SKU: GT-DP25-ESD

### Features & Benefits

- ◆ Manual operation for quick and safe PCB separation
- ◆ ESD-safe design to protect sensitive components
- ◆ **Maximum isthmus length:** 3.0mm
- ◆ Delivers clean and smooth cut edges
- ◆ Economic and user-friendly solution for large-scale PCB depaneling

### About the 2.5mm ESD Nibblers. (Depanelizer Tool)

The 2.5mm ESD Nibbler is a manual depanelizer tool designed to efficiently separate large sheets of multiple PCB panels. It provides quick, economic, and safe PCB separation while leaving well-finished, smooth cut surfaces. With its ESD-safe design, it ensures sensitive components are protected during the depaneling process.

This tool is suitable for PCBs with isthmus (tab) lengths up to 3.0mm, offering precision and reliability in high-volume production environments.
