

# 2000mm SMT Conveyor

SKU: 601-613-1

## Features & Benefits

- ◆ **SMEMA Compatibility:** Ensures smooth integration with other SMEMA-compatible machines for efficient workflow and operation.
- ◆ **Flexible PCB Handling:** Accommodates board sizes ranging from 50 x 50mm to 1960 x 460mm, providing versatility for a wide range of PCB dimensions.
- ◆ **Compact Design:** Its short length makes it ideal for use in areas where space is limited, allowing for flexible placement in any production environment.
- ◆ **Variable Speed Control:** Offers adjustable speeds to suit different tasks and production requirements, improving overall operational efficiency.
- ◆ **Modular Construction:** The modular design allows for easy adjustments and future upgrades to accommodate changing needs.
- ◆ **Sturdy and Durable:** Built with a strong structural design to ensure long-lasting reliability and stable performance in demanding environments.
- ◆ **Precise Adjustment:** Features a smooth parallel ball screw adjustment method, ensuring accurate positioning for consistent results.
- ◆ **Special Aluminium Slot Rail:** Designed to ensure smooth PCB transport and handling, enhancing the overall efficiency of your production line.
- ◆ **CE Certified:** Complies with European safety standards for safe and reliable operation.

## About the 2000mm SMT Conveyor

The 2000mm SMT Conveyor is designed for use in SMD production lines and PCB assembly processes, offering a versatile and reliable solution for equipment linking, visual inspection, manual assembly, and PCB buffering.

Compatible with SMEMA standards, it seamlessly integrates with other production equipment.

Its compact and modular design allows it to fit in limited spaces, providing maximum flexibility in your manufacturing environment.

## Specifications

Property	Detail
Dimensions	1960 x 460mm
Application	ESD-protected areas, electronics mfg, cleanrooms
