

# 75-50mm T Piece Reducer

SKU: 503-628

## Features & Benefits

- ◆ Reduces diameter from 75mm to 50mm for flexible system integration
- ◆ Ideal for connecting 75mm and 50mm hoses in extraction systems
- ◆ Ensures secure and stable airflow control
- ◆ Optimises suction performance and filtration efficiency
- ◆ Durable construction for long-lasting reliability in industrial environments

## About the 75-50mm T Piece Reducer

The BOFA 75-50mm T Piece Reducer is a versatile and reliable component designed to efficiently reduce the diameter of your extraction system from 75mm to 50mm.

Ideal for connecting 75mm and 50mm hoses, this T piece ensures secure and stable airflow control, enhancing the efficiency of your filtration setup.

Perfect for industrial environments, it optimises suction performance while providing the flexibility to manage multiple extraction points.
