

75mm Pen Nozzle - FumeKART

SKU: 503-394

Features & Benefits

- ◆ **Precise Fume Extraction:** The 75mm Pen Nozzle provides a highly focused extraction area, perfect for delicate applications that require careful control over fume capture.
- ◆ **Compatibility:** Designed to work with the FumeKART 75mm arm, ensuring a seamless attachment and optimal performance.
- ◆ **Easy to Attach:** The nozzle can be easily mounted to the 75mm arm of the FumeKART system, making it quick and convenient to set up and use.
- ◆ **Efficient Filtration:** Works alongside the FumeKART's high-performance filtration system to capture harmful fumes and particulates, maintaining a clean and safe working environment.
- ◆ **Durable Design:** Built with robust materials to withstand regular use in industrial and professional environments.

About the 75mm Pen Nozzle - FumeKART

The BOFA 75mm Pen Nozzle is a specialised attachment designed to fit the FumeKART with a 75mm arm.

It is perfect for users who need to precisely target and extract fumes and particles from a smaller or more detailed work area.

This nozzle helps to enhance the precision and effectiveness of the fume extraction process, especially in tasks that require direct and localised extraction, such as laser marking, engraving, and other fine-detail work.
