

8" Scissors ESD

SKU: 107-118

Features & Benefits

- ◆ 8" size for comfortable and efficient cutting in static-sensitive environments
- ◆ ESD-safe design to prevent electrostatic discharge (ESD), protecting electronic components
- ◆ Made with durable materials for long-lasting use in clean environments and assembly areas
- ◆ Black and silver colour for a professional, sleek appearance
- ◆ Printed ESD symbol for easy identification of ESD compliance
- ◆ Ideal for use in ESD-controlled environments like electronics assembly, manufacturing, and testing labs
- ◆ Made with durable materials, the scissors feature a sleek black and silver design and are clearly marked with an ESD symbol to ensure compliance with safety standards

About the 8" Scissors ESD

The ESD 8" Scissor is specifically designed for static-sensitive and cleanroom environments, offering reliable cutting performance while preventing electrostatic discharge (ESD) that could damage delicate electronic components. Essential for use in ESD-controlled areas, such as electronics manufacturing, testing, and assembly lines, these scissors provide an efficient and safe solution for handling sensitive materials. Made with durable materials, the scissors feature a sleek black and silver design and are clearly marked with an ESD symbol to ensure compliance with safety standards. Perfect for professionals working in ESD-sensitive environments, these scissors combine functionality with style.
