

862 Hot Air Handle for 862DA+

SKU: GQ-862DA-HP

Features & Benefits

- ◆ **Compatible with Quick 862DA+ Hot Air Rework Station:** Designed to work seamlessly with the 862DA+ station, delivering reliable performance for all your hot air rework tasks.
- ◆ **Works with 862 Heating Element:** Provides consistent and efficient heat for precise rework and soldering.
- ◆ **Flexible Nozzle Compatibility:** Switch easily between nozzles for different soldering and desoldering applications.
- ◆ **Precision Heat Control:** Ideal for delicate electronic components, offering controlled airflow and optimal heat distribution.
- ◆ **Durable and Reliable:** Built to meet the demands of professional use, ensuring long-lasting performance.

About the 862 Hot Air Handle for 862DA+

The Quick 862 Hot Air Handle is designed for use with the Quick 862DA+ Hot Air Rework Station, providing a professional-grade hot air soldering solution for rework and desoldering tasks.

This handle ensures precise and controlled airflow, essential for working on sensitive components like SMDs and fine-pitch devices. It's compatible with a variety of nozzles, giving you the flexibility to choose the right size for your specific rework needs.

Compatible Nozzles:

- **A1300 8.4mm Nozzle:** Ideal for larger components or wider heat distribution.
- **A1130 4.4mm Nozzle:** A versatile size for most medium to small components.
- **A1124 2.5mm Nozzle:** Perfect for fine-pitch and delicate soldering tasks, providing precision heat application.
