

# AD 2000 iQ

SKU: 503-325

## Features & Benefits

- ◆ **Dual filter system** with a three-stage filtration process (pre-filter, HEPA, and chemical) for maximum capacity and filtration
- ◆ **Intelligent Operating System (iQ)** for continuous airflow and filter performance
- ◆ **User-friendly** control display panel located on top for easy access and filter changes
- ◆ Flexible exhaust configurations, including re-circulation via the rear panel or externally vented hose connections
- ◆ Featuring BOFA's Intelligent Operating System (iQ), the AD 2000 iQ maintains consistent airflow and filtration, even as particulates build up

## About the AD 2000 iQ

The Donaldson BOFA AD 2000 iQ combines cutting-edge technology with robust design to deliver superior fume extraction performance in the most complex environments.

Its dual filter system and three-stage filtration process ensure maximum capacity, providing extended filter life while efficiently capturing fumes and particulates.

Featuring BOFA's Intelligent Operating System (iQ), the AD 2000 iQ maintains consistent airflow and filtration, even as particulates build up.

With a user-friendly design and flexible exhaust options, it's perfect for high-demand applications.

### Compatible with:

- DeepPleat DUO Pre-Filters (x2) A1030336
- Combined HEPA/Gas Filters (x2) A1030335

## Specifications

Property	Detail
Noise Level	75 dBA
Voltage	415V, Three-phase 50Hz, 6.6kw, L1, L2, L3 16A – N 28A
Airflow	of 2500m <sup>3</sup> /hr and pressure of 96mbar for powerful extraction performance
Dimensions	(1280 x 1360 x 1005 mm) designed for large-scale installations
Weight	340kg
Application	ESD-protected areas, electronics mfg, cleanrooms
