

# AD Base 3 Powder Coated

SKU: 503-330

## Features & Benefits

- ◆ Designed to fit seamlessly with the Universal Versa Laser for space-saving installation
- ◆ Onboard air compressor (on compressor models) for air assist requirements
- ◆ Extraction hose kit included for easy setup
- ◆ Powder-coated mild steel construction for durability and protection
- ◆ Low noise operation (< 56 dBA) for quieter working conditions

## About the AD Base 3 Powder Coated

The AD Base 3 is a compact and efficient fume extraction solution specifically designed for the smaller Universal Versa Laser. Its dimensions allow the laser to sit perfectly on top of the unit, effectively doubling it up as a functional workstation. For added convenience, the unit can be equipped with an onboard air compressor, providing the necessary air assist for the laser. It comes complete with an extraction hose kit and compressor link-up on compressor models, ensuring a seamless extraction and air supply system for enhanced performance.

### Compatible with:

- DeepPleat Pre-Filter A1030045
- Combined HEPA/Gas Filter A1030050

## Specifications

Property	Detail
Voltage	230V
Frequency	50/60Hz
Full load current	0.9 amps
Airflow	of 180m <sup>3</sup> /hr and pressure of 30mbar for effective fume extraction
Dimensions	775 x 510 x 680 mm
Weight	74kg
Application	ESD-protected areas, electronics mfg, cleanrooms
