

Acrylic Conformal Coating - 400ml

SKU: 306-116

Features & Benefits

- ◆ Provides excellent protection against moisture and dust for PCBs
- ◆ Transparent, insulating conformal coating
- ◆ Forms a uniform, homogenous film with consistent thickness
- ◆ Cured lacquer remains flexible, will not crack or chip
- ◆ Can be soldered through once fully cured
- ◆ 6-year shelf life from the date of manufacture

About the Acrylic Conformal Coating - 400ml

ACRYLIC CONFORMAL COATING - PROTECTION FOR PCB'S

Ambersil Acrylic Conformal Coating (400ml) offers superior protection for PCBs and electronics, sealing out moisture and dust to ensure long-term reliability.

This transparent insulating coating forms a uniform, flexible, and durable film that won't crack or chip, making it ideal for protecting sensitive components.

With a shelf life of 6 years, this versatile product can be applied easily to populated PCBs and is also solderable after curing.
