

# Articulated Arms - Louvre

SKU: GB-AA-L

## Features & Benefits

- ◆ Ergonomic articulated arms for Louvre panels to enhance flexibility and operator comfort
- ◆ Easily attaches to **standard rear support posts** for both left and right-hand installation
- ◆ Fully adjustable arm with adjustable center joint and end swivel for precise positioning
- ◆ Arm extends from 200mm to 480mm to suit different workspace configurations
- ◆ **Foldable design** to maximise work-surface usage when not in use
- ◆ Ideal for environments requiring ergonomic flexibility and space optimisation
- ◆ Featuring an adjustable center joint and end swivel, the louvre panel can be positioned to present products to the operator or easily folded back towards the rear of the workstation when not in use, ensuring optimal space utilisation

## About the Articulated Arms - Louvre

**Our Articulated Arms for Louvre Panels are designed to provide ergonomic flexibility and maximise work-surface usage in any workstation.**

These ergonomic articulated arms can be easily fitted to any of our **standard rear support posts**, allowing operators to access VDU monitors, information, or parts with ease, depending on the specific arm configuration.

The Louvre Panel Arm is fully adjustable and can be mounted at any height on either the left or right-hand rear support posts, providing further customisation for ergonomic comfort. Featuring an adjustable center joint and end swivel, the louvre panel can be positioned to present products to the operator or easily folded back towards the rear of the workstation when not in use, ensuring optimal space utilisation.

With a Louvre Panel size of 470 x 240mm and an arm extension range from 200mm to 480mm, this system is ideal for dynamic work environments requiring flexibility, space-saving, and ergonomic support.

## Specifications

Property	Detail
Dimensions	470 x 240mm
Application	ESD-protected areas, electronics mfg, cleanrooms
