AVAILABLE

Features & Benefits

- ◆ Ergonomic articulated arms for flexible workstation setup
- ◆ Easily fits to **standard rear support posts** for easy installation
- ◆ Provides access to VDU monitors, information, or parts
- ◆ **Foldable design** allows arms to be tucked away for maximum work-surface usage
- ◆ Ideal for workspace optimisation and tool/document management

About the Articulated Arms - Pin Board

Our Articulated Arms - Pin Board offer an ergonomic solution for improving workspace flexibility and organisation.

Easily mounted on any of our **standard rear support posts**, these articulated arms provide operators with quick and easy access to VDU monitors, information, or parts, depending on the type of arm used.

Designed to maximise workspace efficiency, these arms can be folded away towards the rear of the workstation when not in use, freeing up valuable desk space.

Ideal for workstation optimisation, the Articulated Arms - Pin Board allows users to efficiently manage their tools, documents, and monitors while maintaining an organised and tidy workspace.
