

## Articulated Arms - TFT/Monitor

SKU: GB-AA-M

### Features & Benefits

- ◆ Ergonomic articulated arms for TFT/monitors to enhance flexibility and operator comfort
- ◆ Easily attaches to any **standard rear support posts** for seamless integration
- ◆ Provides easy access to VDU monitors, information, or parts (depending on arm type)
- ◆ **Foldable design** to maximise work-surface usage when the arms are not in use
- ◆ Improves ergonomics by allowing easy adjustment of monitor position
- ◆ Ideal for workstations where flexibility and space optimisation are key

### About the Articulated Arms - TFT/Monitor

**Our Articulated Arms for TFT/Monitors are the ideal solution for enhancing ergonomic flexibility in any workstation, providing operators with easy access to VDU monitors, information, or parts, depending on the type of arm used.**

These ergonomic articulated arms can be easily attached to any of our **standard rear support posts**, offering seamless integration into your workstation setup. Designed for convenience, the articulated arms can be folded away towards the rear of the workstation when not in use, helping maximise work-surface usage and creating more space for other tasks.

Perfect for environments where flexibility and ergonomic design are essential, these arms ensure that monitors are always at the optimal viewing angle, improving productivity and comfort.
