

Attention Now Entering Awareness Sign 300mm Ø ESD

SKU: LAB-62

Features & Benefits

- ◆ **300mm Ø diameter** for clear, visible display on walls, doors, or floors
- ◆ Made from vinyl flexible material – durable and non-slip for high-traffic environments
- ◆ **Self-adhesive backing** for quick, easy installation without tools
- ◆ One-sided design for straightforward placement and messaging
- ◆ Ideal for marking ESD protected areas and enforcing ESD safety protocols

About the Attention Now Entering Awareness Sign 300mm Ø ESD

Our Attention Now Entering Awareness Sign is designed to clearly indicate when someone is entering an ESD protected area, helping to enforce electrostatic discharge (ESD) safety measures. Ideal for walls, doors, or floors, these round awareness signs ensure that individuals are aware of the ESD safety protocols in place. With a 300mm diameter, the sign provides clear visibility, making it easy for everyone to identify the boundaries of ESD-safe zones.

Made from vinyl flexible material, the sign is both durable and non-slip, ensuring safety and longevity in high-traffic areas. The self-adhesive backing allows for easy installation on a variety of surfaces without the need for additional tools or fixtures. The sign is one-sided, making it ideal for places where only one-facing visibility is required.

Enhance your workplace's ESD protection with the Attention Now Entering Awareness Sign, an essential tool for maintaining a safe environment and preventing damage to sensitive electronic equipment.
