- ◆ Long fine neck for precise fingertip control
- ◆ Ridges along the head for easy final 1/4 turn
- ◆ Colour-coded handle with tip-type marking for quick identification
- ◆ Precision-machined tip for secure and damage-free screwdriving
- ◆ Handle injection-moulded to blade for ultimate reliability

About the CK Tools Dextro Screwdriver - Pozi Drive

The CK Tools Dextro Pozi Drive Screwdriver is engineered for precision and long-lasting durability.

Crafted from premium chrome molybdenum/vanadium steel, this screwdriver is hardened and tempered to provide superior performance, while its satin chrome plating protects against corrosion.

The ergonomically shaped dual-component handle ensures exceptional comfort and control, with a long, fine neck that allows for precise fingertip control.

The ridged head makes it easier to complete the final 1/4 turn, and the colour-coded handle with tip-type marking ensures easy identification.
