- ◆ Precision-machined tip ensures secure and damage-free screwdriving
- ◆ Handle injection-moulded to blade for ultimate reliability
- ◆ With a premium chrome molybdenum/vanadium steel blade, it is hardened and tempered for superior performance and features satin chrome plating to protect against corrosion

### About the CK Tools Dextro Screwdriver - Slotted Parallel

**The CK Tools Dextro Slotted Parallel Screwdriver is built for precision and durability.**

With a premium chrome molybdenum/vanadium steel blade, it is hardened and tempered for superior performance and features satin chrome plating to protect against corrosion.

The ergonomically designed dual-component handle ensures a high level of comfort and control, while the long, fine neck provides precise fingertip control.

Its ridged head makes the final 1/4 turn easier to complete, and the colour-coded handle with tip-type marking enables quick identification.
