

Ceasolder Peelable Rubber Latex Solder Mask PCM 350ml

SKU: 390-155

Features & Benefits

- ◆ **High-Temperature Resistance:** Designed to withstand the heat of wave soldering processes.
- ◆ **Peelable:** Easily removed by hand without breaking or leaving residue.
- ◆ **Flexible Latex Masking:** Ideal for masking components such as IC sockets, pin connectors, and adjustable pots.
- ◆ **Solvent Resistant:** Does not contaminate conformal coatings, ensuring clean results.
- ◆ **Room Temperature Drying:** Dries at room temperature for convenience.
- ◆ **Manual or Automated Application:** Can be applied manually or dispensed via automated systems for precision.
- ◆ **High Film Strength:** Ensures durability, allowing for easy handling and precise application.

About the Ceasolder Peelable Rubber Latex Solder Mask PCM 350ml

Qualitek Ceasolder is a high-temperature-resistant rubber latex solder mask designed to temporarily protect metal surfaces during the wave soldering process.

Ideal for protecting sensitive components and areas, Ceasolder can be applied directly from the bottle or dispensed via pneumatic systems.

This flexible, peelable latex mask ensures precise coverage without contaminating conformal coatings, making it perfect for protecting areas like pin connectors, adjustable pots, and IC sockets.

Once the soldering process is complete, the mask can be manually peeled off without leaving any residue, ensuring clean, undamaged surfaces. The high film strength makes Ceasolder easy to handle and apply, even with automated dispensing machines.

WASHING INSTRUCTIONS

Care & Washing Instructions

In order to preserve the long life of ESD clothing, you are advised to use industrial laundries who can provide controlled, documented washing procedures and environment.

- ◆ **MACHINE WASHABLE** — in cold or not warmer than 40°C (104°F) lukewarm water with neutral liquid detergent.
- ◆ **DO NOT USE** — detergent or fabric softeners containing bleach or chlorine, or any other form of alkalis or acids.
- ◆ **DO NOT TUMBLE DRY** — dry in the open air.
- ◆ **DOES NOT REQUIRE IRONING** — but if necessary the maximum temperature is 110°C (230°F) or lower.
- ◆ **DRY CLEANABLE** — with any solvent except Trichloroethylene.
