

# Clear A4 Binders ESD

SKU: 107-103

## Features & Benefits

- ◆ Permanent static-dissipative P.V.C. for reliable ESD protection in ESD-sensitive environments
- ◆ Made from Inherently Dissipative Polymer (IDP), which is not humidity-dependent, ensuring consistent ESD protection in any environment
- ◆ **A4 size**, ideal for storing standard documents, PCB designs, and other ESD-sensitive components
- ◆ Transparent design allows easy identification of contents while ensuring ESD safety
- ◆ Recyclable material for environmentally conscious use
- ◆ **Standard print**: ESD symbol, Recycling symbol, and Lot Number for easy identification of ESD compliance

## About the Clear A4 Binders ESD

**Clear ESD Binders are the perfect solution for document storage and handling in Electrostatic Protected Areas (EPAs).**

These high-quality binders are made from permanent static-dissipative P.V.C., providing long-lasting ESD protection for sensitive documents and materials. Designed to meet the needs of ESD-sensitive environments, these binders are constructed from Inherently Dissipative Polymer (IDP), ensuring that their static-dissipative properties are maintained regardless of humidity.

These transparent binders are A4 size, making them compatible with standard documents, and they offer an ideal solution for protecting paperwork, PCBs, and other static-sensitive components from electrostatic discharge (ESD). The recyclable material makes them an environmentally responsible choice, while the ESD symbol and Recycling symbol printed on each binder clearly indicate compliance with ESD safety standards. These binders also conform to the IEC-61340-1-5 International Standard, ensuring they meet the highest ESD protection requirements for electronics and manufacturing industries.

## Specifications

Property	Detail
Foil thickness	0.25mm
Application	ESD-protected areas, electronics mfg, cleanrooms
