

Component Counter CC-15

SKU: 506-130

Features & Benefits

- ♦ **Counting Range:** From 0 to 999,999 in both directions
- ♦ **Adjustable Divisor:** For accurate component counting (single, double-tape, and SMDs)
- ♦ **Optional Label Printer Interface:** For printing component counts
- ♦ **Seamless Integration:** Can be mounted to Cutbend and Variocut machines
- ♦ **Comprehensive Package:** Includes counting head, tape feeder, and mains adapter unit
- ♦ For added convenience, the CC-15 features an optional interface that enables printing the component count using a label printer, providing a clear and organised way to track inventory

About the Component Counter CC-15

The CC-15 electronic counter is a versatile tool designed to streamline processes in areas such as incoming goods inspection, work preparation, and stock taking.

This easy-to-use counter can count from 0 to 999,999 in both directions, making it perfect for high-volume counting tasks. With the adjustable divisor, the CC-15 ensures accurate counting of single and double-tape components as well as SMDs.

For added convenience, the CC-15 features an optional interface that enables printing the component count using a label printer, providing a clear and organised way to track inventory. It can be easily mounted to the Cutbend and Variocut machines, integrating seamlessly into your workflow.

The CC-15 is delivered with a counting head, tape feeder, and mains adapter unit, ensuring everything you need to get started is included.

The SMD Rewinding Unit CB-112 is ideal for rewinding SMD reels and works in combination with the CC-15 counter. Please ask for details.
