

Copper Foil Tape (Length 33 Metres)

SKU: 301-021-19

Features & Benefits

- ◆ Smooth copper foil backing with conductive acrylic adhesive
- ◆ Removable liner for easy handling and die-cutting
- ◆ Suitable for EMI shielding, grounding, and static charge draining
- ◆ Excellent chemical and solvent resistance
- ◆ Highly conformable for easy application to uneven surfaces
- ◆ Ideal for use before applying antistatic floor paint for enhanced static protection
- ◆ **33 Metre reel length** for high-volume applications
- ◆ Cost-effective solution for preventing static build-up and grounding personnel in non-corrosive conditions

About the Copper Foil Tape (Length 33 Metres)

This 19mm, high-quality copper foil EMI shielding tape features a conductive acrylic pressure-sensitive adhesive, making it ideal for grounding and static charge draining applications.

The tape is backed with smooth copper foil and comes on a removable liner for easy handling and die-cutting.

It provides an affordable, high-spec solution for preventing static build-up and grounding personnel, especially when applied before antistatic floor paint.

Commonly used in non-corrosive environments, this tape ensures effective EMI shielding and grounding in various industrial and electronic applications.

Specifications

Property	Detail
width	19mm
Application	ESD-protected areas, electronics mfg, cleanrooms
