

DPF300 Deburring Guide

SKU: 601-125-5

Features & Benefits

- ◆ Compatible with the DPF-300 system for precise deburring
- ◆ Interchangeable guide plate for accurate PCB handling
- ◆ Special shape prevents damage to assembled circuits
- ◆ Available 3.0mm diameter milling bits for versatility
- ◆ Guide plate and milling bits are **matched and not interchangeable** for precise operation

About the DPF300 Deburring Guide

The DPF 300 Deburring Guide from Piergiacomini is a precision tool designed for optimal PCB handling during depaneling.

Compatible with the , it offers accurate deburring, reducing the risk of damage to assembled circuits.

Its unique shape prevents harm to delicate components, even if the insertion is incorrect. The guide plate and milling bits are designed as matched pairs, ensuring flawless compatibility and precision with every operation.

offer versatility for various tasks.
