

DPF300 Guide Plate 5mm Short

SKU: 601-111 | Sizes: 1.0 mm, 1.2 mm, 1.3 mm, 1.5 mm, 1.6 mm, 1.7 mm, 1.8 mm, 1.9 mm, 2.0 mm, 2.1 mm, 2.2 mm, 2.3 mm, 2.4 mm, 2.5 mm, 3.0 mm

Features & Benefits

- ◆ Interchangeable guide plate for accurate PCB handling during depaneling
- ◆ Special shape prevents damage to assembled circuits, even with incorrect insertion
- ◆ Made from hardened and tempered steel for durability
- ◆ Compatible with milling bits for FR4, CE, M materials (1.0 - 3.0mm diameters)
- ◆ Available milling bits for aluminium (1.0 - 3.0mm diameters)
- ◆ Guide plate and milling bits are **matched and not interchangeable** for precise operation
- ◆ The main feature of DPF-300 is the INTERCHANGEABLE GUIDE designed by Piergiacomini

About the DPF300 Guide Plate 5mm Short

The DPF-300 5mm SHORT Guide Plate is a crucial accessory for the DPF-300 PCB depaneling system.

The main feature of DPF-300 is the INTERCHANGEABLE GUIDE designed by Piergiacomini.

Designed with safety and precision in mind, this interchangeable guide plate helps operators accurately place and pull the circuit board during the depaneling process. Its unique shape protects the circuit from damage, even if the guide is inserted incorrectly, ensuring that no harm comes to the assembled board.

Crafted from hardened and tempered steel, the guide plate is durable and long-lasting. It works seamlessly with milling bits for hard metal, specifically designed for FR4, CE, and M materials.

The guide plate and milling bits are matched pairs, ensuring precision and compatibility. A separate guide plate for aluminium milling is also available.
