

DPF300 Milling Bits (Aluminium) (10 Pk)

SKU: 601-120 | Sizes: 1.0 mm, 1.3 mm, 1.5 mm, 1.6 mm, 1.7 mm, 1.8 mm, 1.9 mm, 2.0 mm, 2.1 mm, 2.2 mm, 2.3 mm, 2.4 mm, 2.5 mm, 3.0 mm

Features & Benefits

- ◆ Optimised for aluminium milling in PCB depaneling
- ◆ **Standard diameters:** 1.0mm to 3.0mm
- ◆ Pack of 10 milling bits for continuous use
- ◆ Specifically matched with guide plates for accuracy
- ◆ Not interchangeable to ensure optimal performance
- ◆ These bits feature a precision geometry that allows for efficient cutting and long-lasting performance when working with aluminium materials

About the DPF300 Milling Bits (Aluminium) (10 Pk)

The DPF300 Milling Bits (Aluminium) are specifically engineered for milling aluminium in PCB depaneling applications.

These bits feature a precision geometry that allows for efficient cutting and long-lasting performance when working with aluminium materials.

The standard diameters available range from 1.0mm to 3.0mm, providing flexibility to suit a variety of PCB depaneling needs. Supplied in a pack of 10, these milling bits ensure you always have a replacement on hand.

Guide Plates and Milling Bits are **specifically matched for optimal performance and are not interchangeable**, ensuring precision during each use.
