

DPF300 Milling Bits (Standard) (10 Pk)

SKU: 601-115 | Sizes: 1.0 mm, 1.3 mm, 1.5 mm, 1.6 mm, 1.7 mm, 1.8 mm, 1.9 mm, 2.0 mm, 2.1 mm, 2.2 mm, 2.3 mm, 2.4 mm, 2.5 mm, 3.0 mm

Features & Benefits

- ◆ Designed for hard metals like FR4, CE, and M materials
- ◆ **Standard diameters:** 1.0mm to 3.0mm
- ◆ Pack of 10 milling bits for high-volume usage
- ◆ Matched with specific guide plates for optimal precision
- ◆ Ideal for PCB depaneling in production environments
- ◆ These high-quality milling bits are perfect for use in PCB depaneling and feature standard diameters ranging from 1.0mm to 3.0mm

About the DPF300 Milling Bits (Standard) (10 Pk)

The DPF300 Milling Bits are designed for precision milling in hard metals, with a specific geometry optimised for FR4, CE, and M materials.

These high-quality milling bits are perfect for use in PCB depaneling and feature standard diameters ranging from 1.0mm to 3.0mm. The set includes a pack of 10, ensuring that you have plenty of spares for your work.

Guide Plates and Milling Bits are specifically matched for use with each other and are not interchangeable, ensuring optimal performance and precision during the depaneling process.
