

De-Solder Pump Universal ESD - Solder Sucker

SKU: GT-PD-ESD

Features & Benefits

- ◆ **ESD Safe:** Prevents electrostatic discharge, safeguarding delicate components.
- ◆ **Efficient solder removal:** Ideal for cleaning up residual solder during de-soldering tasks.
- ◆ **Easy operation:** Simple push-button mechanism for quick, effective solder extraction.

About the De-Solder Pump Universal ESD - Solder Sucker

The De-Solder Pump Universal ESD is a high-quality, easy-to-use tool designed for efficiently removing residual solder during de-soldering operations.

Its ESD-safe construction ensures that sensitive electronic components remain protected from electrostatic discharge, making it an ideal choice for precision work in electronics repair. With its ergonomic design and reliable performance, this solder sucker allows for quick and effective solder removal, ensuring clean joint disassembly.

Specifications

Property	Detail
Length	215mm, offering a comfortable and easy-to-handle design
Application	ESD-protected areas, electronics mfg, cleanrooms
