

# Dotted Palm Grip Gloves ESD (10 Pairs)

SKU: G-G101 | Sizes: Small, Medium, Large, Extra Large

## Features & Benefits

- ◆ **ESD Protection:** Surface resistivity of  $10^{10}$  /ohms sq ensures these gloves effectively protect sensitive electronics from electrostatic discharge, making them ideal for use in microelectronics and assembly areas.
- ◆ **PVC Dotted Palm:** The dotted PVC palm provides an excellent non-slip grip, ideal for handling delicate parts in microelectronics, packing, and other precision tasks.
- ◆ **Good Elasticity:** The gloves feature good elasticity, allowing for a comfortable fit and excellent flexibility, which ensures ease of movement during prolonged use.
- ◆ **Sweat Absorbency:** These gloves offer excellent sweat absorbency, helping to maintain comfort during long hours of use, making them ideal for workers in high-precision environments.
- ◆ **Ventilation:** Designed with good ventilation, these gloves reduce the risk of overheating and ensure breathability, keeping hands cool and dry in extended use situations.
- ◆ **Delicate Round Tip Finishing:** The gloves are finished with delicate round tips for extra comfort and to prevent any discomfort during wear, especially for tasks requiring fine handling.
- ◆ **Pack Size:** Sold in **packs of 10 pairs**, ensuring bulk convenience and value for businesses.

## About the Dotted Palm Grip Gloves ESD (10 Pairs)

### ESD Anti-Static Gloves with PVC Dotted Palm – Ideal for Microelectronics & Assembly

These ESD Anti-Static Gloves are designed to provide optimal protection against electrostatic discharge (ESD), making them perfect for microelectronics, assembly, and packing tasks. With PVC-dotted palms for enhanced grip and non-slip properties, these gloves offer the perfect balance of comfort, functionality, and ESD protection.

#### Specifications:

- **Surface Resistivity:**  $10^{10}$  /ohms sq – for effective ESD protection
- **Palm Coating:** PVC Dots – Non-slip and enhanced grip
- **Material:** Elastic fabric with good ventilation
- **Elasticity:** High stretchability for a comfortable and secure fit
- **Sweat Absorption:** Excellent sweat absorption for comfort during long wear
- **Finish:** Delicate round tip finishing for added comfort
- **Pack Size:** 10 pairs per pack
- **Colour:** Natural/Grey (depending on manufacturer)
- **Cuff Style:** Elastic wrist

These ESD Anti-Static Gloves with PVC dotted palms offer the ideal combination of ESD protection, comfort, and functionality for workers in microelectronics, assembly, and packing industries. The good elasticity, excellent sweat absorbency, and non-slip properties make them an essential piece of protective gear in environments where electrostatic discharge must be prevented.
