

Dual Footwear & Wrist Strap Test Station (100 Megohms) ESD

SKU: 106-116

Features & Benefits

- ◆ **Three settings:** wrist strap only test, footwear only test, and dual test feature for simultaneous testing of wrist strap and footwear
- ◆ **Includes tester, wall plate, dual footplate, and connecting leads**
- ◆ CE approved for safety and quality assurance
- ◆ The Combination ESD Tester offers three versatile settings: wrist strap only test, footwear only test, and a dual test feature that allows you to test both your wrist strap and footwear simultaneously

About the Dual Footwear & Wrist Strap Test Station (100 Megohms) ESD

The Combination ESD Tester offers three versatile settings: wrist strap only test, footwear only test, and a dual test feature that allows you to test both your wrist strap and footwear simultaneously.

This comprehensive tester is ideal for ensuring full ESD protection and compliance in workplaces and controlled environments.

The kit includes the tester, wall plate, dual footplate, and connecting leads, providing everything you need for efficient electrostatic discharge (ESD) testing.

Designed to meet the requirements of IEC 61340-5-1, this tester is CE approved, ensuring its quality and safety standards.

Perfect for environments requiring reliable ESD testing for both hands and feet, the Combination ESD Tester offers convenience and accuracy in one compact unit.
