

# DustPRO 250 - 115V

SKU: 503-346

## Features & Benefits

- ◆ **High-Performance Extraction:** Effectively filters dust and particulates during industrial processes such as engraving and grinding.
- ◆ **Brushless Pump:** Provides continuous operation, ensuring durability and extended running times with minimal maintenance.
- ◆ **Large Filter Capacity:** Includes a 6.4-liter bag filter and a high-efficiency HEPA filter for superior filtration performance.
- ◆ **Durable Build:** Constructed with powder-coated mild steel, ensuring long-term reliability and robustness.
- ◆ **Electrical Data:**
  - ◆ 115V Single-phase 1~ 50/60Hz
  - ◆ Full load current: 1.2 amps / 0.135W
  - ◆ Fuse rating: 2 amps.

## About the DustPRO 250 - 115V

The BOFA Dust PRO 250 (115V) is designed for industrial applications where efficient particulate and dust extraction is needed. This system helps filter swarf, dust, and smaller particulates generated during processes like routing, mechanical engraving, grinding, and turning.

### Compatible with:

- Bag Filter A1030241
- HEPA Filter A1030287

## Specifications

Property	Detail
Voltage	Designed for 115V applications, making it suitable for regions with 115V power supply
Airflow	180m <sup>3</sup> /hr
Noise Level	Operates quietly at <59dBA, minimising noise disruption in work environments
Dimensions	520 x 290 x 270mm
Weight	10kg, making it portable and easy to move around if necessary
Application	ESD-protected areas, electronics mfg, cleanrooms
