

# DustPRO 250 - 230V

SKU: 503-345

## Features & Benefits

- ◆ **Industrial-Grade Extraction:** Ideal for collecting swarf, dust, and particulates generated during various mechanical processes.
- ◆ **Brushless Pump:** Provides continuous operation with long-lasting durability and minimal maintenance requirements.
- ◆ **Large Filter Capacity:** Features a 6.4-liter bag filter combined with a high-efficiency HEPA filter to ensure effective filtration.
- ◆ **Low Noise Level:** Designed for quieter operation, ensuring a comfortable working environment.
- ◆ **Durable Construction:** Built with powder-coated mild steel for robust performance in demanding industrial environments.

## About the DustPRO 250 - 230V

The BOFA Dust PRO 250 is a high-performance particulate and dust extraction system, designed for a wide range of industrial applications.

It effectively filters swarf, dust, and smaller particulates generated during processes like routing, mechanical engraving, grinding, and turning.

### Compatible with:

- Bag Filter A1030241
- HEPA Filter A1030287

## Specifications

Property	Detail
Voltage	230V, suitable for standard voltage applications
Airflow	180m <sup>3</sup> /hr
Electrical Data	230V
Noise Level	< 59dBA, ensuring quieter operation during extended periods of use
Dimensions	520 x 290 x 270mm
Weight	10kg, lightweight and portable for ease of mobility within the workspace
Application	ESD-protected areas, electronics mfg, cleanrooms
