

# DustPRO Universal

SKU: 503-347

## Features & Benefits

- ◆ **High-Performance Filtration:** Efficiently extracts dust, swarf, and particulates from industrial processes to help maintain a cleaner working environment.
- ◆ **Brushless High-Vacuum Pump:** Designed for continuous running over long periods, ensuring durability and minimal maintenance.
- ◆ **Large Filter Capacity:** Equipped with an 18-litre capacity filter bag and a HEPA filter to capture fine particulates effectively.
- ◆ **Durable Build:** Constructed from powder-coated mild steel, offering robustness and longevity in industrial settings.
- ◆ **Voltage:** Supports a wide voltage range of 115V-230V, making it versatile for different regions and work environments.
- ◆ **Airflow/Pressure:** Delivers 285m<sup>3</sup>/hr airflow with 96mbar pressure, ensuring efficient extraction and filtration of particulates.
- ◆ **Electrical Data:**
  - ◆ 115V-230V Single-phase 1~ 50/60Hz
  - ◆ Full load current: 12.5 amps / 1.1kw
- ◆ **Noise Level:** Operates at a low noise level of <66dBA during typical operation, maintaining a quieter workspace.
- ◆ **Dimensions (HxWxD):** 590 x 460 x 535mm, making it a compact solution for various industrial applications.
- ◆ **Weight:** 33kg, providing a sturdy but manageable weight for easy placement and use.

## About the DustPRO Universal

The BOFA Dust PRO Universal is a stand-alone industrial dust extraction and filtration system.

Specifically designed for the filtration of swarf and small particulates generated during processes like routing, mechanical engraving, grinding, and turning.

**Compatible with:**

- 
- 

## Specifications
