

# ESD (100 x PCB) Trolley

SKU: 109-112

## Features & Benefits

- ◆ ESD (100 x PCB) trolley designed for storing and carrying printed circuit boards (PCBs) in ESD-sensitive environments
- ◆ **100 available PCB slots** for efficient organisation and storage
- ◆ Easy width adjustment for accommodating different PCB sizes
- ◆ Comes with 1 single fixed panel, 1 single adjustable panel, and 1 double adjustable panel for versatile storage solutions
- ◆ Ideal for electronics manufacturing, workshops, and assembly lines
- ◆ Ensures electrostatic discharge (ESD) protection for safe transport of sensitive components
- ◆ This trolley features 100 available PCB slots, designed to safely accommodate your static-sensitive components

## About the ESD (100 x PCB) Trolley

The ESD (100 x PCB) Trolley is a highly efficient and secure storage solution for transporting large quantities of printed circuit boards (PCBs) in ESD-protected environments.

This trolley features **100 available PCB slots**, designed to safely accommodate your static-sensitive components. With an easy width adjustment, it can be tailored to fit varying PCB sizes, supporting a max PCB thickness of 4mm and a 10mm pitch between slots. The panel depth is 450mm, and the trolley offers an overall width of 1100mm, with a working width of 1000mm, providing ample storage space. The trolley comes equipped with **1 single fixed panel, 1 single adjustable panel, and 1 double adjustable panel**, allowing for customisation based on your storage needs.

Ideal for workshops, assembly lines, and electronics manufacturing, the trolley ensures safe, efficient storage and transportation of PCBs, maintaining electrostatic discharge (ESD) protection.

## Specifications

Property	Detail
Max PCB thickness	4mm
Panel depth	450mm
Application	ESD-protected areas, electronics mfg, cleanrooms
