

ESD 175M Shear Cutter

SKU: 205-101

Features & Benefits

- ◆ **Type:** Shear cutter with safety clips and soft handles
- ◆ **ESD Safe:** Ensures protection for sensitive components
- ◆ **Shear Cutting Action:** Superior bypass blade action for better cuts with less effort
- ◆ **Reduced Mechanical Shock:** Minimises mechanical shock delivered to the work
- ◆ **Safety Clip:** Prevents accidental injury and ensures safe storage
- ◆ **Ergonomic Handles:** Soft handles for enhanced comfort and reduced fatigue
- ◆ Featuring a low profile and safety clips, it ensures safety while cutting and offers enhanced control

About the ESD 175M Shear Cutter

The ESD 175M Shear Cutter is a high-performance tool designed for precise, low-effort cutting in general-purpose applications, particularly in electronics.

Featuring a low profile and safety clips, it ensures safety while cutting and offers enhanced control.

The superior blade bypass shear cutting action reduces the effort required, enabling smoother and better cuts with half the effort compared to conventional cutters. With soft ergonomic handles, it reduces hand fatigue during extended use.

It is ESD safe, providing protection against electrostatic discharge, and is capable of flush cutting soft wire up to 20 AWG (0.8 mm).

Specifications

Property	Detail
Cutting Capacity	Flush cuts soft wire up to 20 AWG (0.8 mm)
Application	ESD-protected areas, electronics mfg, cleanrooms
