

# ESD C.L. Workstations 1000mm

SKU: GB-E-CL10 | Sizes: 450mm, 600mm, 750mm, 900mm

## Features & Benefits

- ◆ Cantilever Workstation with modular design for maximum manoeuvrability in ESD-sensitive environments
- ◆ Full ESD protection with a unique multi-connector for 10mm snap and 4mm banana connections
- ◆ Grounding points insulated through the front rail for safe electrostatic discharge management
- ◆ 40mm location holes to accept rear support posts for upper-bench accessories
- ◆ 20mm worktops available in Microstat® or Florite laminate for ESD protection (resistance of 107 - 109 ohms)
- ◆ Worktops available in pale grey laminate, grey/blue marmolium, or MDF with water-based lacquered finish
- ◆ Adjustable feet for levelling to ensure stability
- ◆ Featuring a modular design, this bench offers total flexibility with customisable upper and lower workstation accessories

## About the ESD C.L. Workstations 1000mm

**The Cantilever workbench is specifically designed for assembly operations that require maximum manoeuvrability in ESD-sensitive environments.**

Featuring a modular design, this bench offers total flexibility with customisable upper and lower workstation accessories. Available in the standard 00A05 grey colour, all standard and ESD drawers and cupboards are universally compatible with the workstation range. This work station comes with full ESD protection, including a unique multi-connector for 10mm snap and 4mm banana connections, making it easy to integrate wrist straps and cords. The grounding points are insulated through the front rail, ensuring safe electrostatic discharge (ESD) management.

With 40mm location holes for easy installation of rear support posts, this bench can accommodate a variety of upper-bench accessories. The 20mm worktops, available in Microstat® or Florite laminate, provide additional ESD protection with resistance of 107 - 109 ohms, making them ideal for static-sensitive tasks. Worktops are offered in pale grey laminate, grey/blue marmolium, or MDF, and all feature a radiused front edge with a water-based lacquered finish. Adjustable feet allow for easy levelling, ensuring stability in every application. The Cantilever Workstation is available in a range of sizes and depths, from **600mm to 2000mm in length and 450mm to 900mm in depth**, with a **standard height of 760mm** (special order available for **840mm height**).

### CLICK HERE FOR WORKSTATION ACCESSORIES

**Any of our workstation range can be supplied with ESD protection, using either of the following:**

- Microstat® or Florite laminate - grey, 105 - 107 ohms
- Soft feel synthetic rubber, blue/grey, 107 - 109 ohms

## Specifications

Property	Detail
Standard Height	760mm (840mm available for special order)
Length	600mm, 1200mm, 1500mm, 1800mm, 2000mm
Depth	450mm, 600mm, 750mm, 900mm
Application	ESD-protected areas, electronics mfg, cleanrooms
