

# ESD Distance Cutters

SKU: G-HT-C23

## Features & Benefits

- ◆ **Italian-made** for reliable, high-quality performance
- ◆ **Flush cutting** for clean and precise cuts on PCBs
- ◆ **ESD safe** to protect against static discharge during use

## About the ESD Distance Cutters

These **ESD Distance Cutters** are high-quality Italian-made tools designed for cutting printed circuit boards (PCBs) with precision. Ideal for delicate tasks, these side cutters offer flush cutting, ensuring clean, accurate cuts without damaging sensitive components. The cutters are ESD safe, providing protection against static discharge during use in electronic applications. With a maximum PCB thickness of 1.5mm and a maximum tab length of 2.0mm, these cutters are the perfect choice for working with fine electronics and ensuring smooth, precise cuts.

## Specifications

Property	Detail
Maximum PCB thickness	1.5mm
Maximum tab length	2.0mm
Tool length	115mm
Application	ESD-protected areas, electronics mfg, cleanrooms
