

# ESD Double Trolley

SKU: 109-116

## Features & Benefits

- ◆ ESD trolleys for safely moving static-sensitive components
- ◆ Designed to accommodate **ESD containers** and **ESD picking bins**
- ◆ **Two shelves** for efficient storage and easy access to items
- ◆ **Swivelling castors** for full range of movement, with **2 lockable rear castors** for secure storage
- ◆ ESD powder-coated frame for added durability and corrosion resistance
- ◆ Durable zinc-plated shelves for strength and easy maintenance
- ◆ Sturdy castor locks for enhanced security and stability
- ◆ ESD castors to ensure electrostatic protection during transport
- ◆ **Trolley Dimensions:** L640 x W420 x H660mm, **Handle Height:** 1020mm
- ◆ Solid construction with quality components for reliable, long-lasting use

## About the ESD Double Trolley

**ESD Trolleys are the perfect solution for safely transporting static-sensitive components around the production line.**

These trolleys are designed to accommodate standard **ESD containers** and **ESD picking bins**, making them an essential tool for ESD-protected environments.

Equipped with **two shelves**, they provide ample space for moving items and boxes around safely and efficiently.

The **swivelling castors** allow for full range of movement, while **two lockable rear castors** ensure the trolley can be securely stored in any part of the working area.

Built with an ESD powder-coated frame for durability, and zinc-plated shelves for long-lasting performance, these trolleys are solidly constructed with quality components that won't let you down.

Whether for workshops, assembly lines, or industrial environments, these ESD trolleys are designed to meet the highest standards of electrostatic discharge (ESD) protection.

### Trolley Dimensions:

- L640 x W420 x H660mm
- Handle Height 1020mm
