

ESD Flux Bottle. 50 ml Straight Nose with Needle.

SKU: G-SPB-50

Features & Benefits

- ◆ 50ml ESD Flux Bottle with straight nose and needle for precise dispensing
- ◆ Designed for use at grounded ESD work surfaces and handled by grounded operators
- ◆ Easy to squeeze for controlled flux dispensing
- ◆ Highly visible with ESD markings for immediate identification
- ◆ Provides static protection in static-sensitive environments
- ◆ The bottle is highly visible, featuring clear ESD markings that immediately signal to users that the bottle provides static protective properties, ensuring it is safely used in environments where ESD protection is critical

About the ESD Flux Bottle. 50 ml Straight Nose with Needle.

The ESD Flux Bottle is a 50ml bottle with a straight nose and needle, specifically designed for use at grounded ESD work surfaces and handled by grounded operators to ensure safe and effective electrostatic discharge (ESD) control.

This static dissipative flux bottle allows users to easily squeeze the bottle to dispense its contents precisely, making it ideal for controlled application in static-sensitive environments.

The bottle is highly visible, featuring clear ESD markings that immediately signal to users that the bottle provides static protective properties, ensuring it is safely used in environments where ESD protection is critical.
