

ESD Fully Ergonomic Chair

SKU: 111-116 | Sizes: Glides / Black Vinyl, Glides / Charcoal Fabric, Glides / Blue Fabric, Castors / Black Vinyl, Castors / Charcoal Fabric, Castors / Blue Fabric

Features & Benefits

- ◆ Gaslift swivel height adjustment with a height range of 450-590mm
- ◆ ESD protection that prevents static build-up and safely dissipates to earth
- ◆ Compliant with European Standard EN 61340-5-1:2001, ensuring suitability for static controlled environments
- ◆ **Available in 3 colours:** Charcoal fabric, Blue fabric, and Black vinyl
- ◆ Ideal for use in electronics, electrical industries, and other ESD-sensitive environments

About the ESD Fully Ergonomic Chair

Affordable ESD seating and static control for use in the electronics & electrical industries. Specifically designed for use in the electronics and electrical industries, where protection against electrostatic discharge (ESD) is essential.

This ergonomic chair effectively dissipates static electricity, preventing its build-up and safely channeling it to earth. It is an essential addition to any workspace where electrostatic discharge (ESD) protection is crucial.

Fitted with a gaslift swivel height adjustment, this chair offers adjustable comfort with a height range of 450-590mm, ensuring it suits a variety of users and workstations. The ESD chair meets the European Standard EN 61340-5-1:2001, ensuring compliance with ESD safety regulations and making it suitable for use in environments that require static control.

Available in three attractive colours – Charcoal fabric, Blue fabric, and Black vinyl – the chair provides both comfort and durability. The materials are designed to withstand the demands of a busy, high-traffic workspace while maintaining ESD protection.
