

ESD Fully Ergonomic Chair (High)

SKU: 111-116-H | Sizes: Black Vinyl, Charcoal Fabric, Blue Fabric

Features & Benefits

- ◆ **Height adjustment:** 500-690mm for flexible and ergonomic use
- ◆ Gaslift swivel height adjustment for easy and smooth operation
- ◆ Designed to dissipate static electricity and prevent build-up, providing ESD protection
- ◆ Compliant with European Standard EN 61340-5-1:2001, ensuring suitability for static controlled environments
- ◆ **Available in 3 colours:** Charcoal fabric, Blue fabric, and Black vinyl for style and durability
- ◆ Ideal for electronics, electrical industries, and any environment requiring ESD safety

About the ESD Fully Ergonomic Chair (High)

Affordable ESD seating and static control for use in the electronics & electrical Industries. Specifically designed for use in the electronics and electrical industries, where protection against electrostatic discharge (ESD) is essential.

This chair is engineered to prevent the build-up of static electricity by dissipating it directly to earth, making it the perfect seating solution for static controlled environments.

Fitted with gaslift swivel height adjustment, the chair offers a height range of 500-690mm, allowing users to easily adjust it to their preferred working position. The ergonomic design ensures comfort and support for long hours of use, reducing fatigue and improving productivity. This chair complies with the European Standard EN 61340-5-1:2001, ensuring it meets the highest standards for ESD safety and is suitable for use in static-sensitive areas.

Available in 3 colour options: Charcoal fabric, Blue fabric, and Black vinyl, this chair combines both durability and aesthetic versatility, making it an ideal choice for a range of work environments.
