

ESD Long Flat Nose Plier

SKU: GT-PN2018-ESD

Features & Benefits

- ◆ ESD-safe grey/black handles to protect against static discharge
- ◆ Long, smooth flat jaws rounded on the outside for safe component handling
- ◆ 160mm tool length for precision and control in tight spaces
- ◆ Steel thickness of 3mm for durability and strength
- ◆ Medium hardness (HRC 48-50) for optimal performance
- ◆ **Weights** 78g for lightweight, comfortable use
- ◆ Ideal for delicate electronics work without damaging components
- ◆ **Grip model:** St
- ◆ **Head:** Medium

About the ESD Long Flat Nose Plier

The PN 2018 ESD Long Flat Nose Plier is designed with long, smooth jaws rounded on the outside, making it perfect for gripping components in tight spaces without causing damage.

The ESD-safe grey/black handles protect sensitive electronic components from static discharge.

With a steel thickness of 3mm and a total length of 160mm, these pliers offer durability and precision. The medium hardness (HRC 48-50) ensures optimal strength, while the lightweight design (78g) provides comfort and control for delicate tasks.
