

## ESD Pink Anti Static Bags Zip Top (100/Pack)

SKU: G-SPZB | Sizes: 3"x5" 75x12.5cm, 4"x6" 10x15cm, 5"x8" 12.5x20cm, 6"x8" 15x20cm, 6"x10" 15x25cm, 8"x10" 20x25cm, 8"x12" 20x30cm, 10"x12" 25x30cm, 10"x14" 25x35cm, 12"x16" 30x40cm

### Features & Benefits

- ◆ **Thickness:**
- ◆ **Open Top:** 75 micron Polyethylene for lightweight, durable protection
- ◆ **Resealable:** 80 micron Polyethylene for secure closure
- ◆ Humidity-independent ESD protection for consistent performance in varying conditions
- ◆ Printed with ESD warning symbol to indicate static-sensitive areas
- ◆ Surface resistance (Rs) <math>< 10^9</math> Ohms for effective static dissipation
- ◆ Ideal for transporting non-static sensitive items into an EPA

### About the ESD Pink Anti Static Bags Zip Top (100/Pack)

**Pink Electrostatic Dissipative Bags are perfect for transporting non-static sensitive devices (e.g. nuts, bolts, and other hardware) into an Electrostatic Protected Area (EPA).**

These antistatic bags are designed to provide low charging and electrostatic dissipative properties, adhering to the BS IEC 61340-1-5 standard.

Ideal for safely moving items within environments where static control is critical, these bags ensure that non-sensitive components are kept safe from electrostatic charges while entering an EPA.

These pink anti-static bags are the perfect solution for ensuring that static-sensitive environments remain protected while transporting non-sensitive items into controlled areas.

### Specifications

| Property    | Detail   |
|-------------|--|
| Application | ESD-protected areas, electronics mfg, cleanrooms |
