

ESD Single Trolley

SKU: 109-115

Features & Benefits

- ◆ ESD trolleys designed for static-sensitive components in ESD-protected environments
- ◆ Ideal for transporting **ESD containers** and **ESD picking bins**
- ◆ **Single shelf** for easy storage and quick access to items
- ◆ **Swivelling castors** for full range of movement and **2 lockable rear castors** for secure storage
- ◆ ESD powder-coated frame for durability and zinc-plated shelves for strength
- ◆ Sturdy castor locks for enhanced security and stability
- ◆ ESD castors to maintain electrostatic safety during transportation
- ◆ **Trolley Dimensions:** L640 x W420 x H170mm, **Handle Height:** 1020mm
- ◆ Solidly constructed with quality components for reliable performance

About the ESD Single Trolley

ESD Trolleys are the ideal solution for safely and efficiently transporting static-sensitive components around the production line. Designed to accommodate standard **ESD containers** and **ESD picking bins**, these trolleys ensure that your sensitive items remain protected from electrostatic discharge (ESD) while in transit.

Featuring a single shelf for easy storage and access, the trolleys are equipped with **swivelling castors** that allow for a full range of movement. With two **lockable rear castors**, these units can be securely stored in any part of the working area.

The ESD powder-coated frame offers durability and protection, while the zinc-plated shelves ensure longevity and ease of cleaning. Built with high-quality components, these trolleys are solidly constructed to withstand the demands of busy production environments.

Trolley Dimensions:

- L640 x W420 x H170mm
- Handle Height 1020mm
