

Earth Bonding Point With 10mm Stud ESD

SKU: 101-091-2

Features & Benefits

- ◆ **10mm stud** for secure and easy grounding connection
- ◆ **No resistor** – ideal for applications where a resistor is not necessary
- ◆ Provides reliable static discharge control in static-sensitive environments
- ◆ Perfect for use with anti-static mats, workstations, and ESD-sensitive equipment
- ◆ Suitable for electronics manufacturing, assembly lines, and ESD-critical environments
- ◆ Featuring a 10mm stud, this earth bonding point allows for secure connections to anti-static mats, workstations, and other ESD-sensitive equipment

About the Earth Bonding Point With 10mm Stud ESD

The Earth Bonding Point with 10mm Stud ESD provides a straightforward and reliable solution for grounding in static-sensitive environments.

Featuring a 10mm stud, this earth bonding point allows for secure connections to anti-static mats, workstations, and other ESD-sensitive equipment.

Unlike other models, this bonding point **does not include a resistor**, making it ideal for applications where a resistor is not required for static control.

Perfect for electronics manufacturing, assembly areas, and other ESD-critical applications, this grounding point ensures efficient and safe static discharge management.
